Oppbouw conceptueel inzicht bij leerlingen

Opbouw les

CL	lesfase	contextualiseren	inleiden	vastzetten
	dialoog	leerkracht gecenterd		
	inhoud	Mind setting. Het onderwerp wordt ingeleid, in context gezet.	Het wetenschappelijk concept aanbrengen.	Het wetenschappelijk concept gebruiken en toepassen in oefeningen, experimenten en vragen.

Probleemstelling

Vlaanderen

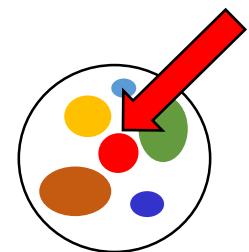

Organismen: 70% van de leerlingen haalt de minimumdoelstellingen

Energie: 30% van de leerlingen haalt de minimum doelstellingen

Andere concepten natuurwetenschappen: 50%

<http://www.ond.vlaanderen.be/curriculum/peilingen>

<http://www.vlaanderen.be/nl/publicaties>

Onderzoeks vragen

- Hoe moet een methodiek worden vormgegeven om, aan de hand van dialoog, de ontwikkeling van concepten te stimuleren?
- Wat is de houding van de leerkrachten en leerlingen tov de methodiek?
- Welke factoren faciliteren of verhinderen de introductie van de methodologie?
- Wat is de impact van de methodologie op het conceptueel inzicht?

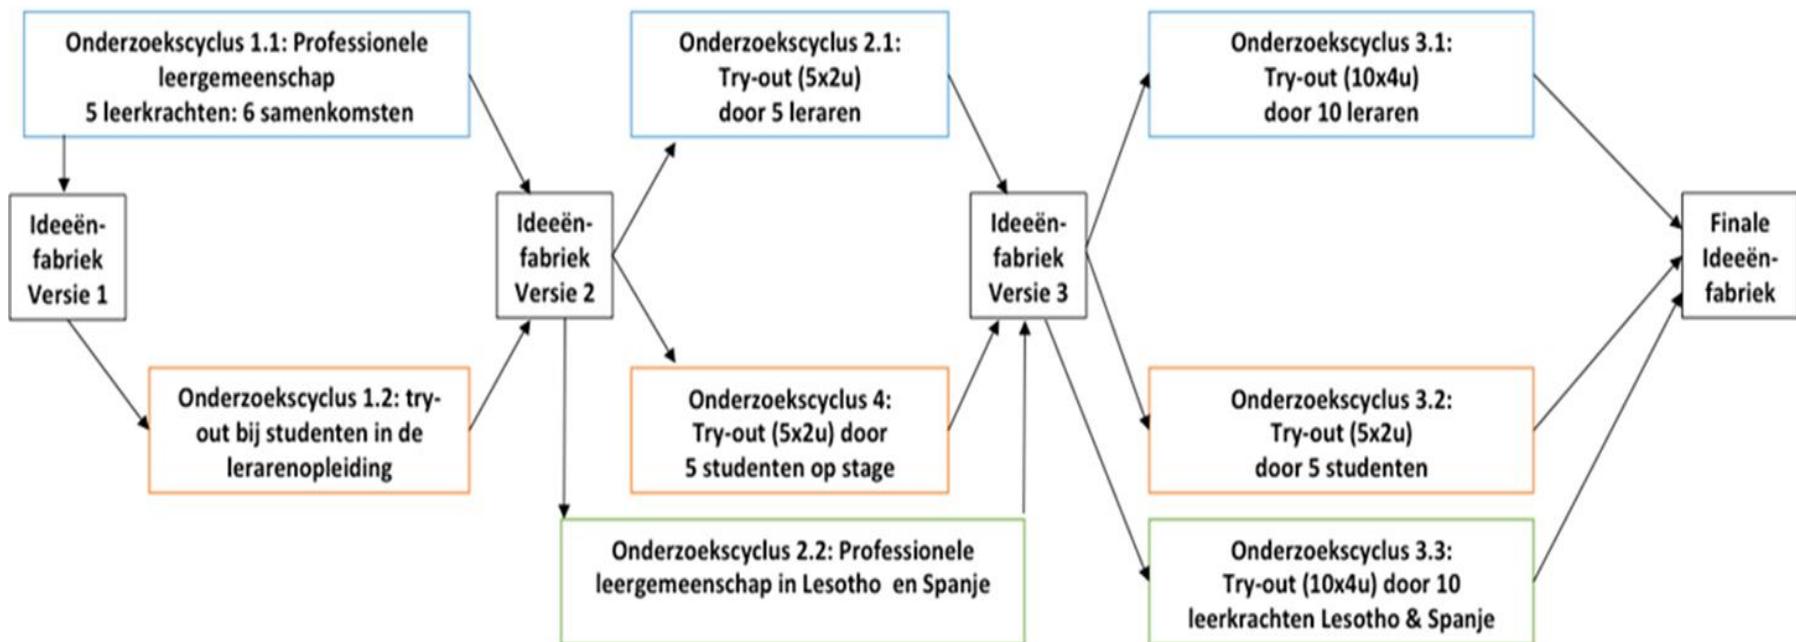

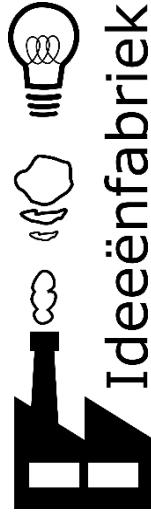

Design based research

WP 3: Ontwikkeling

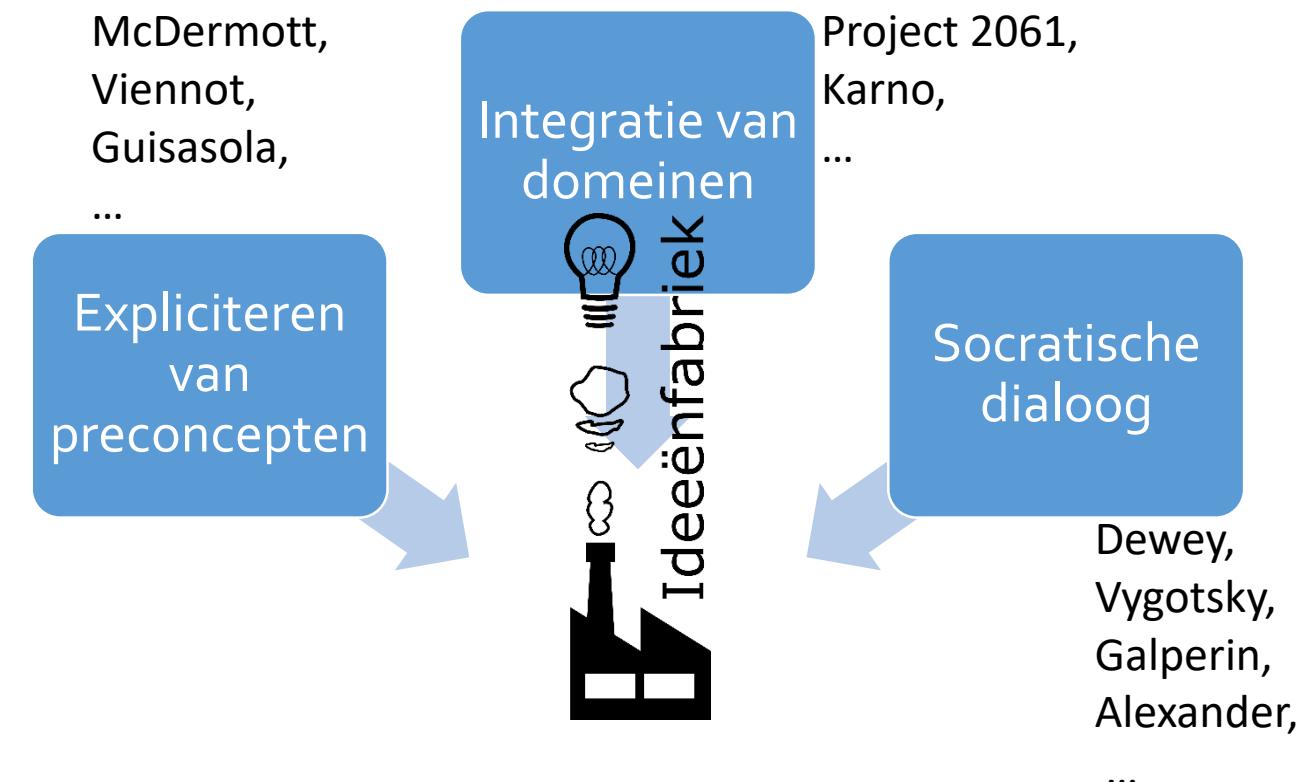

WP 4: Try-out

WP 5: Impact

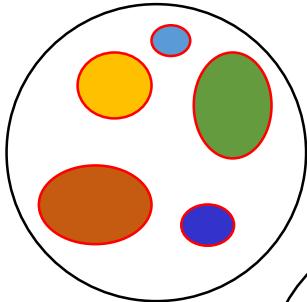

Aanpak

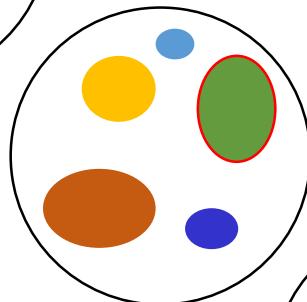

"Rather than replacing the preconception by the scientific concept, a science class should introduce the scientific conceptual framework as an alternative framework that can also reside in the students' mind."

Wakker maken

Wakker maken

Ik wil weten wat jullie idee is over . . . Wat betekent . . . voor jullie? Waarom denk je dat? Wil je nog iets toevoegen? Begrijp ik het zo goed? Bedoel je dat? Weet je dat of denk je dat? Denkt iedereen hetzelfde? Hoe zie je het anders?

“Sommige denken dat alleen bewegende dingen energie hebben, sommige denken dat alleen levende dingen energie hebben, sommige denken dat alles energie heeft.”

Opbouw les

CL	lesfase	contextualiseren		inleiden				vastzetten	
	dialoog	leerkracht gecenterd							
	inhoud	Mind setting. Het onderwerp wordt ingeleid, in context gezet.		Het wetenschappelijk concept aanbrengen.				Het wetenschappelijk concept gebruiken en toepassen in oefeningen, experimenteren en vragen.	
TIMING									
EL	lesfase	wakker maken	identifice- ren	schudden	introduce ren	vastzetten			gebruiken
	dialoog	leerling gecenterd				leer- kracht gecen- terd	leerling gecenterd		
	inhoud	Hoe vul jij dit concept zelf in? Wat denken anderen erover?	Waarover zijn we het niet eens? Waarover bestaat er verwarring?	Je idee werkt niet altijd?	Het wetenschappelijk concept aanbrengen.	Ideeën inoefenen in experimenten en eenvoudige vragen. Hoe zou de wetenschapper dit verklaren?		Het wetenschappelijk idee gebruiken in allerlei probleemstellingen en vragen. Ontdekken dat het idee van de wetenschapper goed blijkt te werken.	

Onderzoeksstuik

$N = 148$ ($N_{\text{exp}} = 90$, $N_{\text{contr}} = 58$)
3 schools, 9 classes, 12-13 y

$N = 60$ ($N_{\text{exp}} = 35$, $N_{\text{contr}} = 25$)
1 universiteit, 3 klassen, 19-21 y

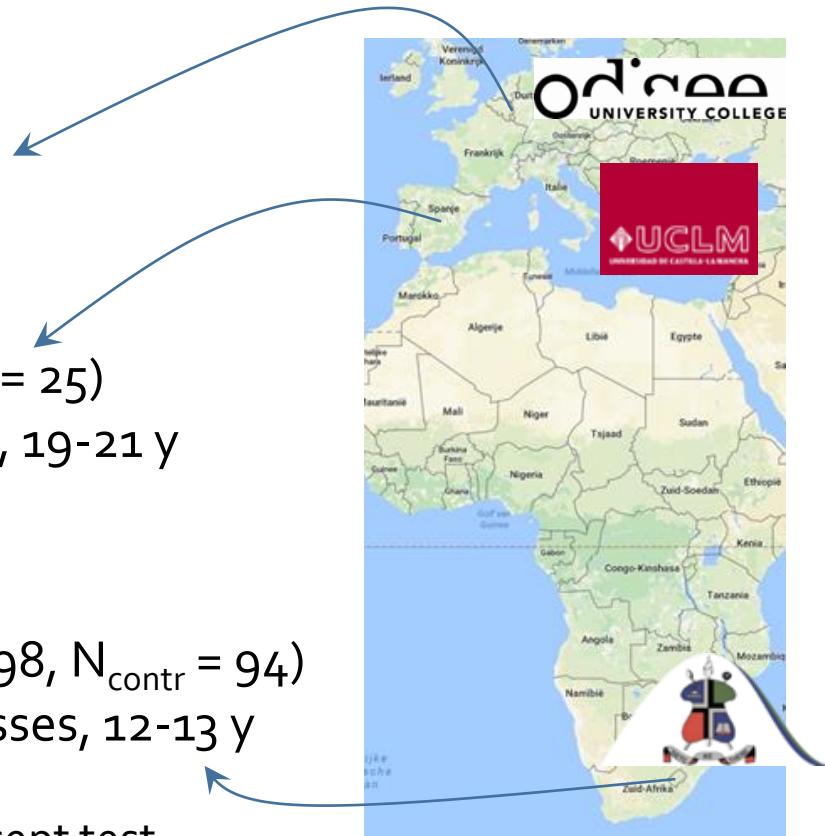

$N = 192$ ($N_{\text{exp}} = 98$, $N_{\text{contr}} = 94$)
2 schools, 4 classes, 12-13 y

Quasi-experimenteel: Pre-post energie concept test

Convenience sample

4u experimentele groep IF

4u controle groep goede klassieke les

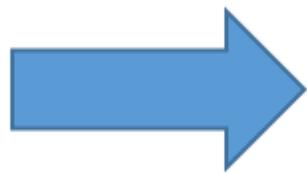

Kwalitatieve resultaten

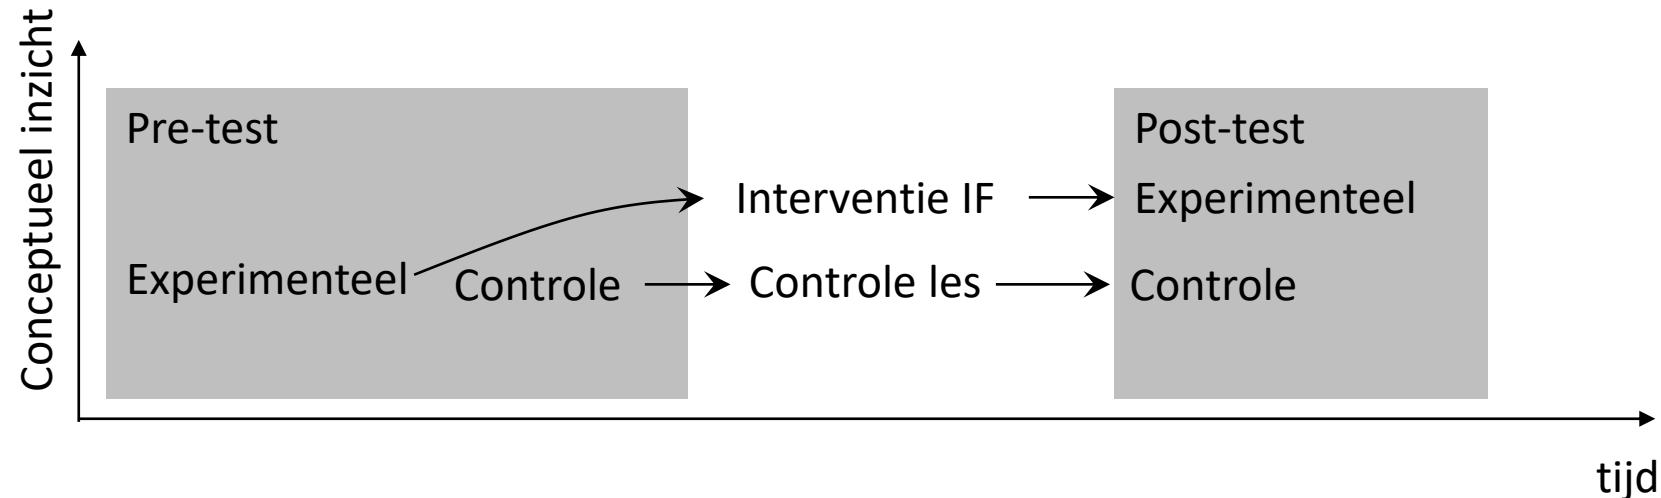

Ervaringen PLG

- Het probleem is herkenbaar
- Aanpak werd positief onthaald
- Realisatie verliep vlot

Zorgen en oplossingen

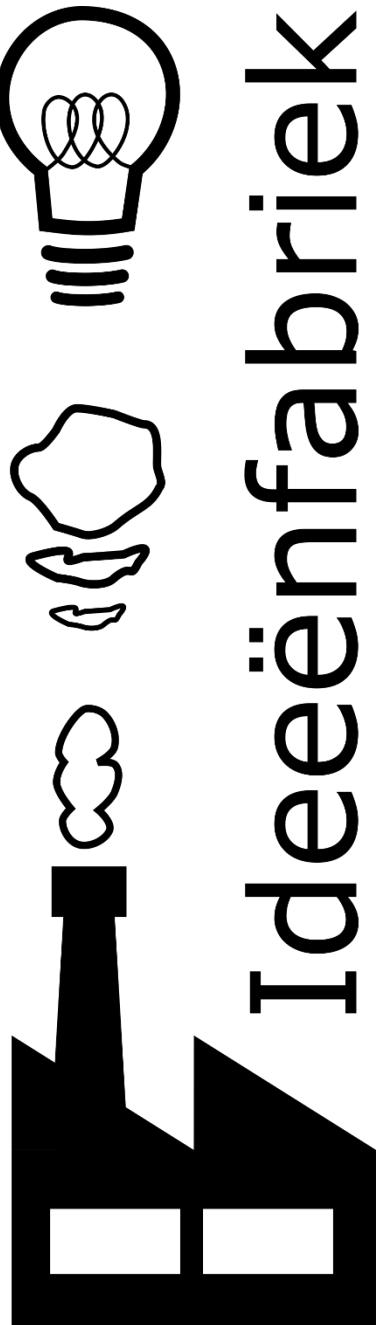

Onvoorspelbaar?		Voorspelde preconcepten
Timing?		EL en CL zelfde duur
Klasmanagement?		motivatie, <u>ownership</u> , zelfsturend
Socratische dialoog?		template (<i>wat doen, zeggen, te verwachten</i>)
Vrij experimenteren?		creatief, inventief, van nature

Kwantitatieve resultaten

Lineair model	Alles heeft energie	Energie kan gecreëerd worden
1 foto (ja/nee)	$p=3,2 \cdot 10^{-4}$ $d_{Cohen}=0,51$	$p=0.29$
2 foto (open antwoorden)	$p=2,5 \cdot 10^{-4}$ $d_{Cohen}=0,70$	$p=0.092$
3 Heron, 2008	$p=5,0 \cdot 10^{-6}$ $d_{Cohen}=0,76$	$p=0.60^*$

* Voorwaarden lineair model niet voldaan

Ideeënfabriek

Dialoog: coach en tolk

Ik wil weten wat jullie idee is over.... Wat betekent ... voor jullie? Waarom denk je dat? Wil je nog iets toevoegen? Begrijp ik het zo goed? Bedoel je dat? Weet je dat of denk je dat? Denkt iedereen hetzelfde? Hoe zie je het anders?

Waarover is er verwarring? Waarover bestaan er verschillende meningen?

Hoe kan dat? Kan je dat verklaren?

Zo denkt de wetenschapper erover. Zo begrijpt hij/ zij het.

Wat willen jullie onderzoeken? Hoe heb je de opstelling gemaakt? Wat zie je in de proef/simulatie? Begrijp ik het zo goed? Wat heeft de andere groep gevonden? Ik zie niet wat je bedoelt. Hoe kan je de opstelling veranderen om de onderzoeksvraag toch te beantwoorden?

Ideeënfabriek

Wake-up

What?

Different ideas exist!

How?

Concept cartoon, classify, odd one out,...

What did we observe?

Dialogue

What does mean to you? What do you mean by that? Do you think this or do you know this? Do I understand correctly that Does everybody think the same? Is what way is your idea different?

"You can not say what ideas of students are good or bad. A teacher said that one thing was correct and I immediately saw the reaction of the other students. They took over that answer or withdrew their opinion."

Translated from a student second year teacher training

Experiment

Example

Wakker maken

Identify

What?

Which idea to target?

How?

Dialogue, concept-tests, demo-experiment to clarify

What did we observe?

Dialogue

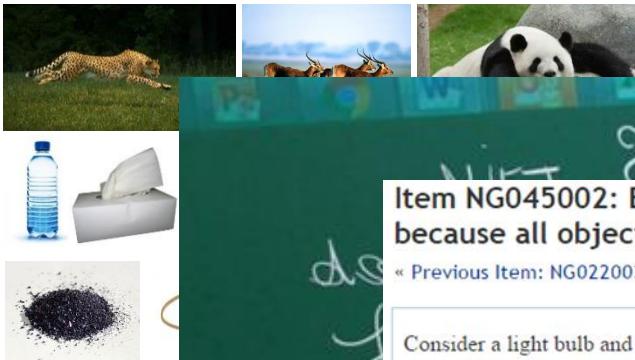

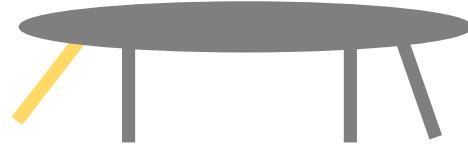

What do we disagree on? What topic needs further investigation? Does the whole class agree that is unclear?

Experiment

Example

Identify

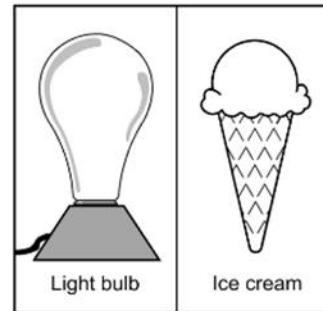

"Some of us think that we have energy, some of us don't."

Item NG045002: Both a light bulb and an ice cream cone radiate energy because all objects radiate energy.

« Previous Item: NG022003

Consider a light bulb and an ice cream cone.

Which gives off energy by radiation and why?

- A. Both a light bulb and an ice cream cone because all objects radiate energy
- B. Neither a light bulb nor an ice cream cone because only the sun radiates energy
- C. Only a light bulb when it is glowing because only glowing objects radiate energy
- D. Only a light bulb when it is hot because only hot objects radiate energy

Item Details

Student Performance

TOPIC

Energy: Forms, Transformation, Transfer, and Conservation

CORRECT ANSWER

A

MISCONCEPTIONS

ANSWER CHOICE: B

NGM036: Only the sun transfers energy in the form of electromagnetic radiation (AAAS Project 2061, n.d.).

ANSWER CHOICE: C

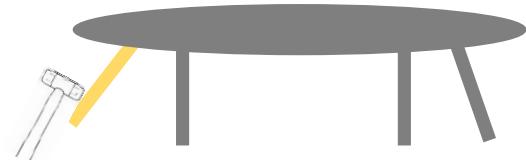

NGM031: Only objects that are glowing can transfer energy in the form of electromagnetic radiation (AAAS Project 2061, n.d.).

ANSWER CHOICE: D

NGM032: Only hot objects can transfer energy in the form of electromagnetic radiation (AAAS Project 2061, n.d.).

Shake

What?

Discrepant event

How?

Demo-experiment, laboratory exercises, “magic”, ...

What did we observe?

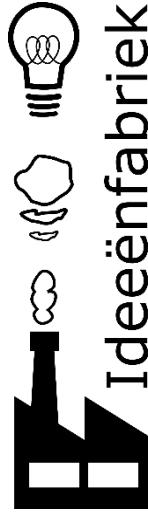

Dialogue

Does this test what we are trying to examine? Does this show what you are saying?

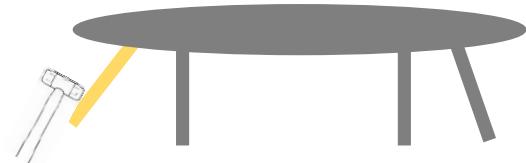

How is this possible? How does this work? Can you explain what is going on?

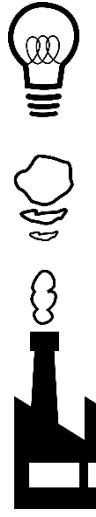

Experiment

Example

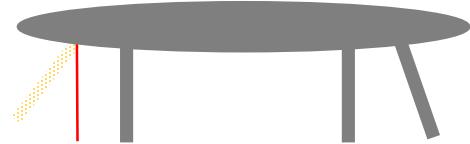

Shake

Introduce

What?

present scientific view

How?

simulation , Lecture

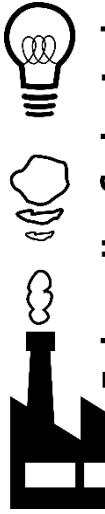

What did we observe?

Dialogue

This is the scientists opinion.

Experiment

Example

Secure

What?

Students experiment to check the science

How?

Through laboratory experiments

if possible: experiments devised by the students

What did we observe?

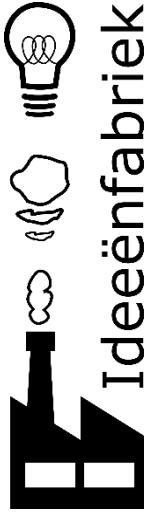

Dialogue

Does this test what we are trying to examine? Does this show what you are saying?

How is this possible? How does this work? Can you explain what is going on?

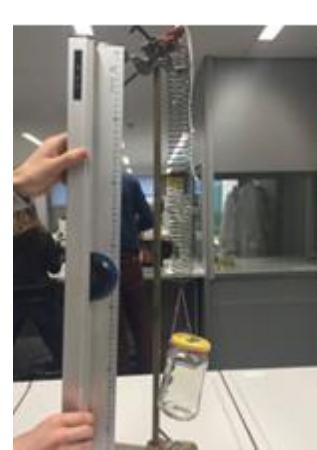

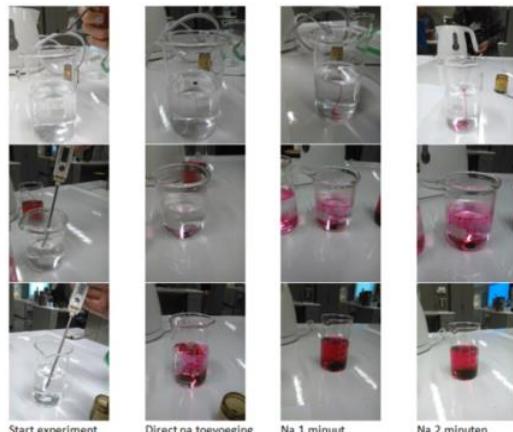

Experiment

Example

Secure

*What properties might contribute to the energy of an object?
Can you show me in an experiment?*

Use

What?

Apply in a new situation

How?

Different experiment, true or false (discuss), what if, activity,...

What did we observe?

Dialogue

Does this test what we are trying to examine? Does this show what you are saying?

How is this possible? How does this work? Can you explain what is going on?

Experiment

Example

Use

What if humans could perform photosynthesis all of a sudden?
What if we could not store energy?

...
